

This response was submitted to the consultation held by the Nuffield Council on Bioethics on *Novel neurotechnologies: intervening in the brain* between 1 March 2012 and 23 April 2012. The views expressed are solely those of the respondent(s) and not those of the Council.

### **Gilbert Tan TS AKA Oogle**

There is nothing wrong with your work as it has already been provided to me in a vision more than 7 years ago and I know all about your technologies. The work you do will open up secrets to the human brain and it can be utilised to help human beings advance to the next level, including helping the disabled. My only concern is the mutation of cells which may create a monster that could theoretically wipe out a species and destroy healthy cells in humans and animals.

I was given an insight of,  
A fighter aircraft so advanced,  
That everything was controlled by,  
Hundreds of applications a second,  
Targeting is via,  
Using the eyes on the screen,  
And the controls are,  
Unlike anything I have ever seen,  
This aircraft is powered,  
Not by the jet engine,  
And it achieved speeds of,  
More than 10 times the speed of sound,  
The aircraft is very silent,  
But I am unable to tell,  
What fuel it uses,  
It is able to hover,  
Bank and turn,  
At a tremendous speed,  
But it is not shaped,  
Like a UFO.
